ORK MARAUDERS NO THREAT TO PERSEUS HIVE

According to a recent release by Battle-Group Perseus Central Command yesterday, recent transmissions from less stalwart Battlezones about Ork movements on Medusa V, are to be “taken with a grain of salt.”

The transmissions state that Ork war parties are cropping up all across Verdia, Tisiphone and the Ferrus Mountains. Their teleporting array, mounted upon an enormous tracked battlefortress, allows the Orks to appear in vital locations with such suddenness and strike with such force that their enemies rarely muster a cogent counter-attack before they are overwhelmed.

Needless to say this is tremendous fun for the Orks, and they have surrounded the tellyporta with thousands of troops to ensure its safety.

Imperial Forces on Medusa V have identified the means by which the Orks are making these lightning attacks and have sent troops to disable the tellyporta in short order.

“Fortunately, the Perseus theatre of operations are well out of this machine’s range” Stated one Official “...And no-one has anything to be worried about, our focus shall remain the supply of Promethium to the other Sectors.”

WITHDRAWAL FROM DIAMEDES, A PLANNED “TACTIAL MEASURE”

Absolom Kleiss, Chaos Space Marine Lord of the Black Legion, Lieutenant of Ygethmor, Supplicor of Chaos Undivided has broken Imperial lines surrounding the Diamedes Mineral Extraction Facility.

Chaos forces have driven deep into Battle Zone Perseus, as far as the Diamedes Mineral Extraction Facility. Priests of the Dark Mechanicum have taken over the facility and slaves captured in the initial phases of the war are even now toiling to produce arms and armour to supply forward troops.

Battle-Group Perseus Eastern Command have stated that this was

all a part of the “overall tactical measures”, put in place from the onset of defensive planning for this conflict.

“The Chaos Forces in the field are unwittingly holding a poisoned chalice, when they occupied the Diamedes Facility” Stated Lieutenant-General Nikolaus Lahne - Commander of the 34th Kroshin Grenadiers “...As a combined force of local PDF, Veteran Grenadiers as well as Ordo Malleus Specialist Troops are moving into position to box-in and cut the lines that connect the advancing Chaos troops with the Diamedes site.”

ADEPTUS MECHANICUS SITE ATTACKED

The excavation known as The Hole, an area declared Quarantine Extremis, has come under attack by Necron forces.

Central Command have since lost contact with the PDF militia and an entire legion of Skitarii who were stationed around the perimeter. Interrogator Pildedus is en-route to Perseus with a strike force to investigate.

TREACHERY UNCOVERED!

Commissar Jens Van Der-Skite, attached to the 23rd Golgothan (Vitalis Ind. Hub), has uncovered a ring of forgery within that battalion’s supply wing.

On an unscheduled investigation of the recipients of Battlefront Honours, the Commissar discovered that several supply clerks were intercepting the lists of Honours, falsifying reports and adding their own names to the medals list.
